Short text about the Artist

Ulla Nolden is a digital artist born in Germany and based in London. She explores the representation of her visual perception through photography and algorithmic movement.

Nolden holds an MA in Computational Arts from Goldsmiths College. Her work has recently been on show at Gazelli Art House London after receiving the Window Project Award.

Additional Details about the artwork

I am fascinated by the varied yet balanced movement of swarms of insects. I perceive beauty in the movement itself, separate from the creature which produces it.

To represent my perception, I translate the behavioural rules of the movement into computational instructions. I visualise the abstract algorithm using the aesthetic language I developed in my photographic work which explores marginal scenes in my everyday surroundings.

This video shows a short rendering of the constantly changing and infinitely continuing movement generated by the algorithm.

The work is part of the 'Pure Movement Series'.
